

QUICK USER GUIDE

InDesign Booklet Creep

Printing · InDesign script

An Adobe InDesign script that compensates booklet creep by progressively scaling pages relative to the spine.

About the product

An Adobe InDesign script that compensates booklet creep by progressively scaling pages relative to the spine.

Installation and first launch

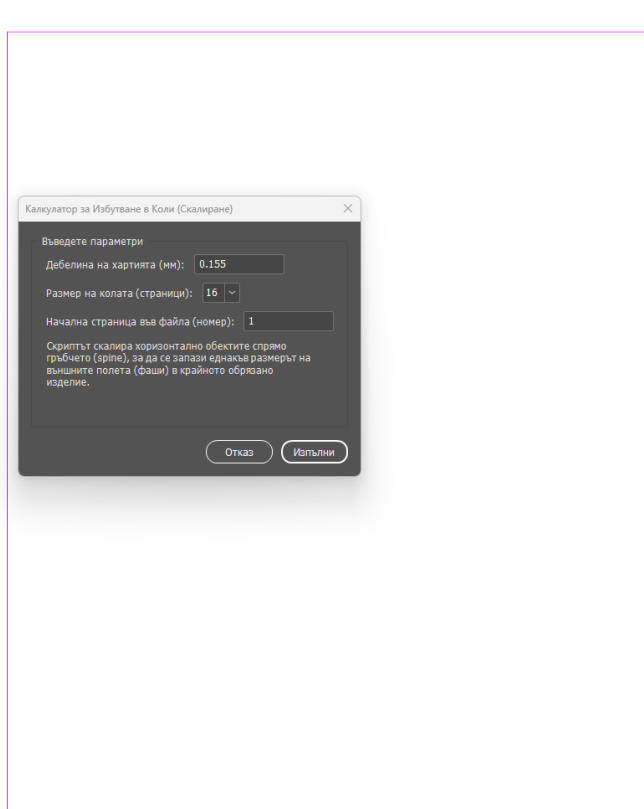

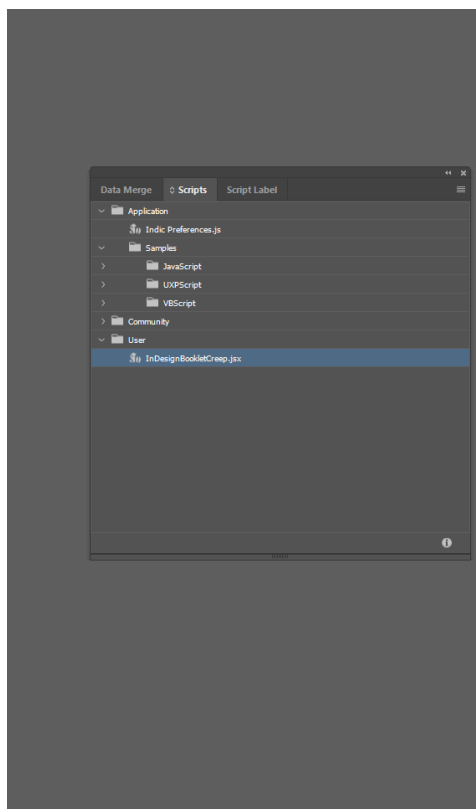

1. Install the Windows or macOS package.
2. The installer copies the script to the current user's InDesign Scripts Panel folder.
3. Open InDesign and choose Window > Utilities > Scripts.

How to use it

1. Open the finished document and save a backup copy.
2. Run InDesign Booklet Creep from the Scripts panel.
3. Enter paper thickness, signature size, and starting page.
4. Confirm the operation and inspect inner and outer pages.
5. If the result is unsuitable, use Undo and adjust the values.

Useful notes

- Adobe InDesign must be installed.
- The script temporarily unlocks required layers and restores their state.
