

QUICK USER GUIDE

Printing Catalog

Printing · Network app

A network catalog for dies, embossing plates, and hot foil tools with search, technical files, shelf labels, and user roles.

About the product

A network catalog for dies, embossing plates, and hot foil tools with search, technical files, shelf labels, and user roles.

Installation and first launch

1. Install the Windows or macOS edition and launch the application.
2. The browser opens at <http://localhost:5050>. From another computer, use the host machine's IP address and port 5050.
3. On the first Windows run, allow firewall access if the catalog will be used on the local network.

Initial sign-in

Username: admin

Password: admin

How to use it

1. Sign in with the initial administrator account and change its password immediately.
2. Choose Dies, Embossing, or Hot foil. Search by code, name, client, size, storage location, or status.
3. Select Add to enter technical data, dimensions, storage position, drawings, and a CAD file.
4. Switch between cards and table view. Open drawings in the viewer and print 80 x 50 mm shelf labels.
5. Use Admin to create users and assign administrator, edit, or view-only roles.

Useful notes

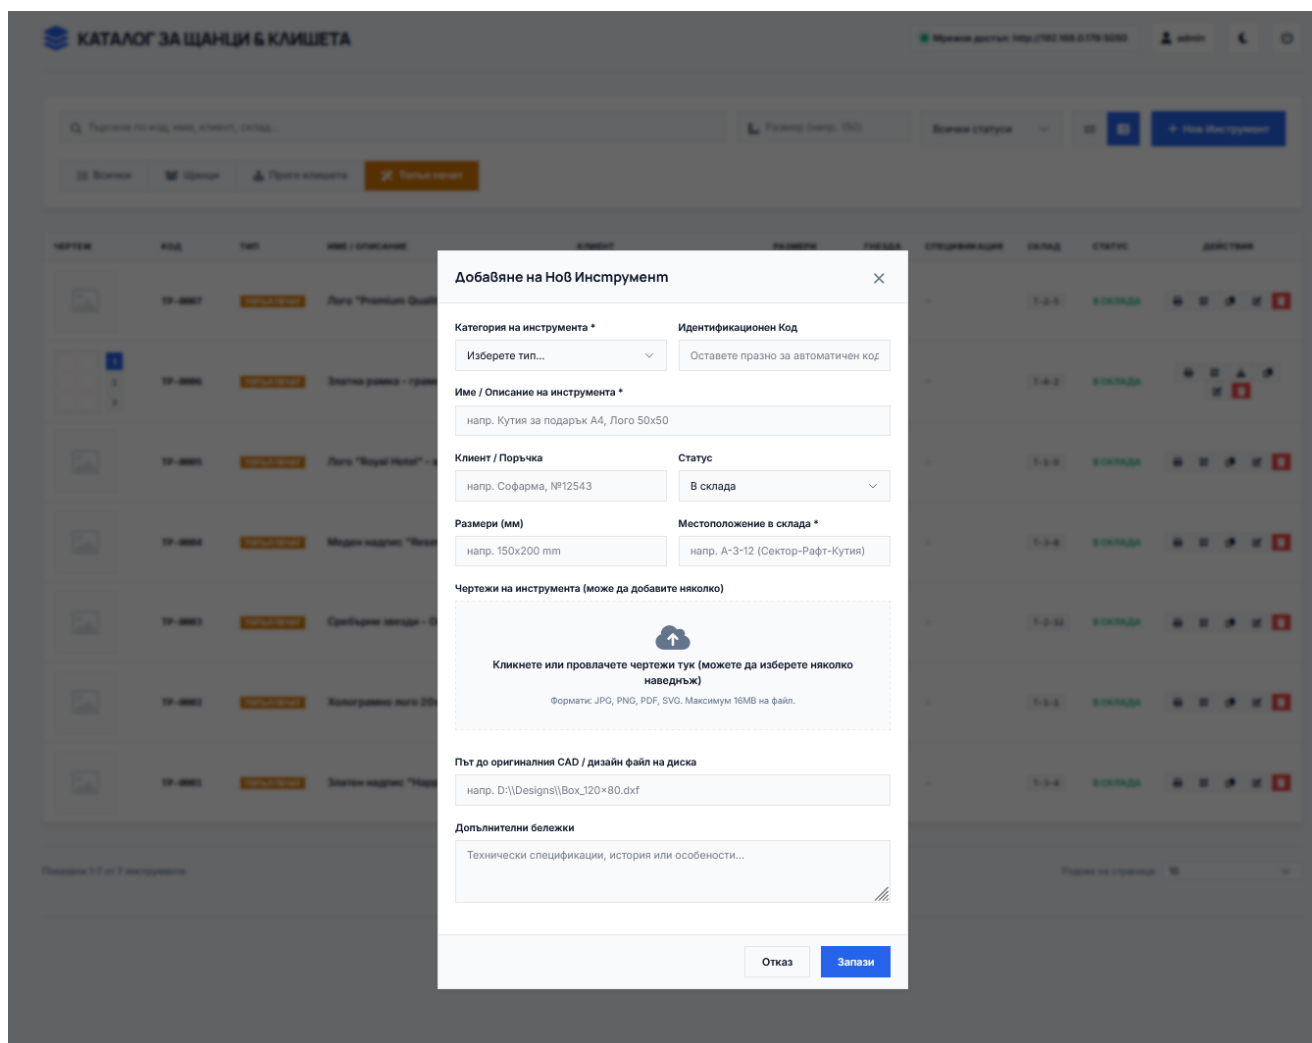

- Data is stored separately from the program and survives reinstallation.
- The administrator power button stops the server for every connected user.
