

VALENTIN BOGDANOV

Quality Assurance

Education

Telerik Academy - Alpha 28 QA Automation

SoftUni - QA Automation

SoftUni - QA Fundamentals

TU Varna - Computer Techniques and Technologies
Higher education

TMT Hristo Botev - Electrical Equipment of Industrial Enterprises
Secondary special education

Software skills

Programming Languages:

- **Java** - Basic Level
- **JavaScript** - Basic Level
- **Python** - Basic Level

Other Languages:

- **HTML/CSS** - Advanced Level
- **SQL/PostgreSQL/MongoDB** - Advanced Level
- **JSON/XML** - Basic Level

Testing software and Frameworks: Selenium, Playwright, Postman, JMeter, Sikuli, PageObject, Rest Assured, Cucumber

Additional Courses and Books

In addition to the core courses I have completed, I have taken several online courses on a variety of topics and read the recommended reading. Here is a list of them:

- **SoftUni** - JavaScript Fundamentals | JavaScript for Front-End | MS SQL
- **ITVDN** - QA Start | Web Testing automation on Java
- **Hillel IT School** - QA Manual
- **Udemy, Youtube and LinkedIn** - Videos and courses on various topics
- **Books** - R. Martin - Clean Code | Sv. Kulikov - Software Testing - Base Course | M. Fewster - Software Test Automation | G. J. Myers, T. Badgett, C. Sandler - The Art of Software Testing | James A. Whittaker - Exploratory Software Testing - Tips, Tricks, Tours, and Techniques to Guide Test Design and other.

English: Level B2

About me

I encountered computers first back in 1984. That is when I discovered programming. And I liked it very much.

During my studies, I started working in polygraphy in particular prepress and design. After 25 years in this profession, I decided to return to programming and more specifically to Quality Assurance.

Why did I choose the latter? For the last 10 years, I have been actively involved in Quality Control of print files. Since I lacked a foundation, I became interested in theory and that got me hooked.

What else can I say about myself?

I am married and have three children.

I would add to my good traits that I am a team player, with a good sense of humour, a certain amount of workaholicism, and a high confidence that does not allow me to give up in terms of difficulties.

My negative traits I try to minimize, but because of my strong character, I impose my opinion and experience over others.

VALENTIN BOGDANOV

Quality Assurance

Work experience

Datacidars Catenate - QA Automation Engineer

Sofia - 08/2023

I maintain the quality of a small project as the sole QA, overseeing tasks for 12 developers. My responsibilities primarily involve testing the user interface, which I often diversify by testing the backend using Postman and RestAssured. Automation is minimally implemented in the project; however, on my own initiative, I developed tests based on Selenium with Java, as well as RestAssured with Java. Currently, I am redeveloping them using Python with Playwright.

Codix - Quality Assurance Analyst

Sofia - 06/2022 - 06/2023

Analysis of issues reported by the client. Testing inbound and outbound interfaces and web services. Kafka integration. Automated tests of Back-End with Postman and RestAssured. Work in a UNIX environment

Brand Quadergy Bulgaria - Quality Control Specialist / Senior Artworker

Sofia - 04/2019 - 12/2020

Quality control of incoming and outgoing files from the studio. Creating checklists for self-control of the artworkers in the studio. Participation in the development and improvement of automatic checks. Preparation of products according to customer briefings, in accordance with the requirements of customer brands and printing technologies. Flexographic, Rotogravure and offset printing are most often printed.

Printing house **J-point Ltd** - Quality Control Specialist / Prepress Specialist

Sofia - 11/2017 - 02/2019

Quality control of client file and subsequent processing in accordance with the possibility of printing. I standardized the process of preparing files for printing. I developed partial automation of processing and electronic assembly.

Printing house **Dedrax Ltd** - Head of Prepress Department / Quality Control

Sofia - 02/2015 - 10/2017

Quality control of incoming client files. I created a system for automation of checking and error correction, which was part of the system for remote approval of the file based on the company's ERP and specialized prepress software.

Goals at work

I am interested in the complete automation of the work process. So far, I've been creating small scripts for prepress products, as well as using specialized software to automate the workflow and optimize performance. The desire for future development in the field of QA is to improve my programming knowledge and go deep into the depths of test automation.

PERSONAL HOBBIES

Of course, I have my hobbies that I use to decrease the stress of work.

I love working with wood and have made almost all of the furniture in my home myself. I practise martial arts. I also spend a lot of time consuming books and documentaries on historical subjects, especially military history.

WHY SHOULD YOU HIRE ME?

Why would I best fit for this position? First, I love to learn. Gathering new information is almost like a drug for me. Second, I have already had established working habits. Working 10 hours a day is normal for me. And third, I am used to being one of the most competent in the team. Right now that's not going to be the case, so I'm going to have to work pretty hard to achieve that.
